ABOUT ME

Tech enthusiast and avid learner with **12+ years** in web, SaaS, and system design. Skilled at solving complex problems, leading by example, and driving scalable solutions across engineering teams. Currently leading Workflows, AI & Importer teams at Go High Level Experts.

- ♦ Migrated legacy billing to microservices, **cutting deployment time from hours to minutes**.
- ♦ Designed multi-tenant subscription system for **100K+ users** with automated billing & recovery.
- ♦ Scaled RabbitMQ & Pub/Sub infra to **2B+ monthly events** with guaranteed reliability.
- ♦ Optimized APIs with Redis + CDN, **reducing response time by 70%** and infra cost by 40%.
- ♦ Built real-time analytics pipelines processing **100GB+ data daily**.
- ♦ Automated CI/CD with Docker, Jenkins, Kubernetes — enabling **daily releases**.
- ♦ Designed high-availability billing ledger ensuring **ACID compliance**.
- ♦ Defined observability stack (Prometheus, Grafana, ELK) improving **MTTR by 45%**.
- ♦ Partnered with product & finance, saving **\$500K+ annually** through infra optimization.
- ♦ Co-founded **OneCompiler** — online IDE scaled to **5M+ users** across 60+ languages.
- ♦ Shipped **AI agentic workflows** (LangChain, RAG, GraphRAG) for 1M+ HighLevel users.
- ♦ Hired and grew the Billing Engineering team from **4 to 12+ engineers**.

WORK EXPERIENCE

Go High Level Experts

India · Remote

Engineering Manager — Workflows, AI & Importer

Oct 2025 — Present

Leading three teams driving roadmap, delivery quality, and AI-driven automation enhancements for 1M+ HighLevel users.

- Own AI-driven enhancements boosting automation intelligence and UX.
- Architect resumable data import pipelines for enterprise onboarding.
- Contribute to hiring, architecture decisions, and long-term product direction.

Stack: NestJS, Node.js, Vue.js, MongoDB, LangChain, RAG, TypeScript

SaaS Labs

Hyderabad · Remote

Senior Engineering Manager — Billing, Balance & Subscriber

Apr 2025 — Oct 2025

Promoted to Senior EM. Expanded ownership across multiple product lines. Drove organizational scaling and hiring strategy.

Engineering Manager — Billing Engineering

Apr 2023 — Apr 2025

Led 12+ member team. Architected Billing & Balance microservices from ground up.

- Stripe integration with retry, dunning, and proration; real-time analytics via BigQuery + Grafana.
- Deployed on GCP with Kubernetes; monitoring via New Relic & Grafana.
- Grew team from 4 to 12+ engineers via hiring & mentorship.

Stack: NestJS, Remix, React, Stripe, MySQL, GCP, Kubernetes, BigQuery

Engineering Manager — Integrations

Feb 2022 — Mar 2023

Architected and built two microservices for third-party API integrations. Managed and mentored a 10-member engineering team.

- Led migration of 200+ customers to new Rep Connector with zero downtime.
- Drove delivery excellence, code quality, and cross-team collaboration.

Development Team Lead — Integrations

Jun 2020 — Mar 2022

Led integration team development. Built and scaled microservices for third-party API integrations. Owned ELK Stack log aggregation across AWS and GCP.

Senior Software Engineer

Apr 2017 — Jun 2020

Built scalable microservices using Java, Spring Boot, and MongoDB. Developed React-based admin tools and dashboards for partner onboarding.

Stack: Java, Spring Boot, Redis, MongoDB, React, ELK, AWS, GCP

Co-Founder & CTO

Nov 2019 — Feb 2022

Architected and developed an end-to-end online IDE platform. Drove product, hiring, and engineering culture from day zero.

- Scaled platform to **5M+ users globally**; designed sandboxed code execution for 60+ languages.
- Built real-time collaborative editor with low-latency sync.
- Launched cross-platform mobile app (Flutter & Dart) — 500K+ downloads, 4.5★.
- Maintained 99.9% uptime on AWS + Docker.

Stack: Next.js, React, Node.js, MongoDB, Docker, AWS, Flutter

Software Engineer — Reporting Platform

2014 — 2017

Developed enterprise reporting UI using React + Kendo UI. Built reporting engine with Java, Spring Boot, Hibernate, Oracle DB and OAF framework.

Stack: React, Kendo UI, Java, Spring Boot, Hibernate, Oracle

TECH STACK

Backend: Java, Spring Boot, Node.js, NestJS, Express, GraphQL, REST

Databases: MongoDB, PostgreSQL, MySQL, Oracle, Redis, BigQuery

AI & Agents: LangChain, OpenAI, RAG, GraphRAG, VectorDB, Prompt Engineering

Observability: ELK, Prometheus, Grafana, New Relic, BigQuery

Frontend: React, Next.js, Vue.js, Remix, Redux, Tailwind, React Native

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, Jenkins, GitHub Actions, Terraform

Architecture: Microservices, Event-Driven, Multi-Tenancy, Performance Tuning

Leadership: Agile · Scrum, OKRs, Hiring, Mentoring, Code Reviews, TDD

EDUCATION & CERTIFICATIONS

B.Tech — Electronics & Communication Engineering

JNTU Kakinada

2009 — 2013 · Graduated 76%

Certified Java Programmer — Java SE 7

Oracle

2014

Oracle Database SQL Certified Expert

Oracle

2015

MongoDB for Developers

MongoDB University
